

SL-810200-BK

BRIO Stereo Soundbar, black

Excellent acoustics and a modern design - the BRIO Stereo Soundbar sets the tone in every respect. With a peak power of 12 watts, the powerful sound system fills every room with excellent audio quality. Thanks to the compact dimensions and the clever arrangement of the two loudspeakers, the BRIO can easily be placed under the computer screen. This design feature saves space and creates a sleek, uncluttered workspace. The easy-to-use volume control highlighted with lighting completes the design. The headphones and microphone can be connected directly to the front of the soundbar if required. So annoying cable replugging on the computer is a thing of the past.
